EDUCATION

Auburn University

Bachelor of Software Engineering

Auburn, AL

Aug. 2023 – May 2027

EXPERIENCE

Software Engineer

June 2026 – Present

Room2Room Movers

Auburn, AL

- Own product engineering across Room2Room's booking, scheduling, logistics, payroll, payments, admin tooling, and mover experiences, supporting operations across multiple college campuses.
- Build and evolve the platform across web, mobile, and backend systems, including an Expo/React Native mover app, Hono REST API, Stripe payment and refund flows, and internal operations tooling.
- Translate operational problems into product and technical solutions, driving features from requirements and architecture through implementation, deployment, and iteration.
- Set engineering standards, review code, and maintain Docker-based development and CI/CD workflows across the platform.

Software Engineer Intern

Aug. 2025 – June 2026

- Built the first cross-platform Room2Room Mover App with Expo and React Native, giving movers a dedicated interface for scheduling and day-of-move logistics.
- Implemented authentication, data persistence, and real-time application state with Firebase while developing core mobile workflows from the ground up.

Information Technology Intern

June 2025 – Aug. 2025

Floor & Decor

Atlanta, GA

- Led a UI/UX redesign of the Premier Pro mobile application and built reusable React Native components for production user flows.

Web Development Intern

Oct. 2023 – Mar. 2024

ChatDB.ai

Auburn, AL

- Built full-stack features with React, Next.js, and Node.js for an AI-powered product that lets users query SQL databases using natural language.

PROJECTS

GoodRepo | *Next.js, TypeScript, Bun, Turborepo, PostgreSQL*

- Built a developer tool that scores GitHub repositories for AI coding-agent readiness using 37 deterministic signals across discoverability, instructions, testability, consistency, tooling, and context efficiency.
- Architected a Bun/Turborepo monorepo with a reusable static-analysis engine, Next.js report experience, GitHub repository ingestion, and optional model-assisted deep analysis.

Handoff | *TypeScript, TanStack, React, Supabase, Bun*

- Built a CLI and web application for small engineering teams to manage and share environment configuration across projects without relying on manual `.env` handoffs.
- Designed organization and project management workflows with TanStack and Supabase and packaged the developer workflow into a command-line interface using Bun and Commander.

CamBot | *JavaScript, Discord.js, React, Next.js*

- Created and launched an open-source Discord application adopted by 200+ communities representing more than 31,000 users.
- Built the bot, supporting web experience, and integration layer across Discord.js, React, and Next.js, maintaining the project as its user base grew.

TECHNICAL SKILLS

Languages & Technologies: TypeScript, JavaScript, Python, Java, C/C++, SQL, React, Next.js, React Native, Node.js, PostgreSQL, Firebase, Docker, Stripe
