EDUCATION

Auburn University

Bachelor of Software Engineering

Auburn, AL

Aug. 2023 – May 2027

EXPERIENCE

Software Engineer

June 2026 – Present

Room2Room Movers

Auburn, AL

- Build and maintain the logistics platform supporting 80+ movers across two campuses for a business generating \$1M+ in revenue in 2026; develop booking, scheduling, payroll, and payment workflows across web, mobile, and backend systems.
- Implement Stripe payment and refund flows, Hono REST API endpoints, internal operations tooling, and Expo/React Native mover features; own delivery from requirements through deployment and iteration.
- Maintain Docker-based development environments and CI/CD workflows, review code, and set engineering standards across the platform.

Software Engineer Intern

Aug. 2025 – June 2026

- Launched the first cross-platform Room2Room Mover App with Expo and React Native, giving movers a dedicated interface for scheduling and day-of-move logistics.
- Implemented Firebase authentication, data persistence, and real-time state for core mobile workflows.

Information Technology Intern

June 2025 – Aug. 2025

Floor & Decor

Atlanta, GA

- Redesigned the UI/UX of the entire Premier Pro mobile application and implemented reusable React Native components for production user flows.

Web Development Intern

Oct. 2023 – Mar. 2024

ChatDB.ai

Auburn, AL

- Contributed to an AI-powered natural-language-to-SQL query product using React, Next.js, and Node.js, supporting a platform that used OpenAI's API and other LLMs to translate user questions into SQL queries.

PROJECTS

GoodRepo | *Next.js, TypeScript, Bun, Turborepo, PostgreSQL*

[GitHub](#)

- Built a repository analyzer that scores AI coding-agent readiness using 37 deterministic signals across six categories and produces actionable reports with traceable findings.
- Designed a reusable static-analysis engine and Next.js report interface in a Bun/Turborepo monorepo, with GitHub repository ingestion and optional model-assisted deep analysis.

Handoff | *TypeScript, TanStack, React, Supabase, Bun*

[GitHub](#)

- Built a web and CLI environment-configuration manager for small engineering teams, with client-side encryption, team sharing, and runtime injection of secrets without writing a `.env` file to disk.
- Implemented organization and project management with TanStack and Supabase, and a Bun/Commander CLI for developer workflows.

CamBot | *JavaScript, Discord.js, React, Next.js*

[GitHub](#)

- Launched an open-source Discord application adopted by 200+ communities representing more than 31,000 users.
- Built and maintained the Discord.js bot, React/Next.js web experience, and integration layer as the community grew.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C/C++, SQL

Frameworks & Data: React, Next.js, React Native/Expo, Node.js, Hono, PostgreSQL, Supabase, Firebase

Tools & APIs: Git, Docker, CI/CD, Bun, Turborepo, Stripe, OpenAI API
