EDUCATION

Auburn University

Bachelor of Software Engineering

Auburn, AL

August 2023 – May 2027

EXPERIENCE

Software Engineer Intern

August 2025 – Present

Room2Room Movers

Auburn, AL

- Developer for the Room2Room Mover App, a cross-platform mobile application built with Expo (React Native) to streamline mover scheduling and logistics
- Designed and implemented core app features, ensuring seamless UI/UX and robust integration with Firebase for authentication, data storage, and real-time updates.
- Collaborated with project stakeholders to define requirements, prioritize features, and deliver iterative releases on a tight schedule.

Information Technology Intern

June 2025 – August 2025

Floor & Decor

Atlanta, GA

- Led a complete UI/UX redesign of the Premier Pro App, enhancing user experience and interface consistency across platforms.
- Developed and implemented front-end components using React Native, improving application responsiveness and maintainability.
- Collaborated with cross-functional teams including designers, product managers, and QA to align on user requirements and technical feasibility.

Web Development Intern

October 2023 – March 2024

ChatDB.ai

Auburn, AL

- Contributed to the construction of systems that enabled users to interact with SQL databases using natural language through the integration of OpenAI's API and other Large Language Models (LLMs).
- Leveraged React, Next.js, Node.js, and other full-stack technologies to create a set innovative user-facing features and tools for operational enhancements.

PROJECTS

gethandoff.dev | *TanStack, Supabase, React, TypeScript, Bun*

- Created a CLI- and web-based .env manager for small (1-20) development teams.
- Used TanStack to build a full-stack web app for the dashboard and organization management, then commander for building a Node.js CLI tool

Infinite Crafter | *Next.js, Supabase, OpenAI API*

- Created a browser game with 100+ weekly visitors, inspired by popular browser game Infinite Craft by Neal.fun.
- Leveraged Next.js and OpenAI's API to create backend API endpoints to dynamically create new elements based on the elements chosen by the user

CamBot | *JavaScript, React, Next.js, Discord.js*

- Created and launched an open-source Discord bot, utilized in over 200 servers with over 31,000 users.
- Designed and developed a website using React, Next.js, and Tailwind CSS, seamlessly integrating with the Discord bot client for enhanced user engagement and experience

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, TypeScript, HTML/CSS, Ruby

Frameworks: React, Node.js, Next.js, JUnit, Tailwind, ShadCN, Expo

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, Copilot, Cursor

Technical Skills: Visual Studio Code, Gradle, Node.js, CLI, Git, GitHub, Linux, Windows, MacOS, Vim, Agile Development, Arduino, CI/CD, UI and UX, Version Control Systems, Web Development, Full-Stack Development, Front-End Development, Back-End Development, API, Tailwind, React Native

Soft Skills: Teamwork, Leadership, Critical Thinking, Time Management, Detail Oriented, Collaboration, Team-building
